

Two Days Workshop for Under Graduating Mechanical Students

On

“Manufacturing Processes and CNC Machining”

30th -31st August, 2019

Mechanical Engineering Department, GIDC Degree Engineering College, Abrama, Navsari conducted 2-days workshop for final year mechanical engineering students on “Manufacturing Processes and CNC Machining” dated 30th-31st August, 2019. In present era, Industries are in great need of professionals with thorough knowledge of manufacturing process and CNC programming in India and Abroad. Manufacturing trend has made a quantum leap towards CNC from conventional methods.

The workshop aimed to make one familiar with the various manufacturing operations/processes, manual programming, computer assisted programming, tool and work setting and product machining simulation on Fanuc/Siemens/Hass controller machine. The contents for workshop had been specially designed with keeping in mind the industry needs, advances in technology and a very practical approach to learn the subject. Managing Director, **Mr. P. V. Dabholakar** of Tucson Hydro -Controls Pvt. Ltd. Umbergaon delivered his industry exposure during the sessions and **Dr. D. C. Patel** explored on CNC programming as well as hands on practice by CNC Simulator. The programme was coordinated by **Prof. (Dr.) H. S. Patil** and **Dr. D. C. Patel** and it was encouraged by our Principal **Prof. (Dr.) N. D. Sharma** and supported by our institute **SSIP Cell**.

Prof. Dr. H. S. Patil

Professor and Head

Mechanical Engineering Department

GDEC Abrama, Navsari
